

# Cell Therapies Event Series

Partnership Prospectus 2024

PRODUCED BY

**hansonwade**

# OUR MISSION

The **Cell Therapy Series** promises to deliver a dedicated forum for every niche within the cell therapy industry; uniting those working across the full drug development landscape, as well as providing the space for communities prioritizing a particular cell type or technology advancement to come together. As we continue to follow the trends across the field, we hope to leave no cell therapy stone unturned, and no member of the team unserved.

The **Cell Therapy Series** is committed to facilitating end-to-end conversations across pharma, biotech and academic thought-leaders, to foster collaboration and shared learnings from novel construct design to advance tumor targeting, through to innovative pricing models to improve access.

Each meeting will provide data-driven case studies, thought-provoking discussion sessions, and dedicated networking opportunities, to enable this community to achieve their clinical and commercial potential.

In 2023, we strive to be the world leading event organizer for the cell therapy industry, providing a valuable forum for every function of every company, to facilitate the advancement of safe, effective and accessible cell therapies for patients globally.

# TESTIMONIALS FROM CELL THERAPY SERIES PARTNERS:

"Excellent meeting with high quality lead potential."

Director - Scientific & Alliances, Axion Biosystems

"It was a valuable and informative conference with relevant topics, speakers, and attendees."

Global Key Account Director, BD Biosciences

"Everything at the event was done with great preparation and executed perfectly. I am extremely impressed by the professionalism of the team. I look forward to the next Hanson Wade conference!"

Director - Product Management & Marketing, Agilent

"Communication was on point. The venue was exceptional, and the quality of the summit as a whole was above expectation. The event planners and representatives were professional and delivered adequately. Very well organized. "

Associate Scientist - Clinical, Catalyst Clinical Research

"The support and help from the team to support our networking efforts was of great help. They helped us to establish contact with several attendees, which resulted in very productive discussions that in the future could lead to fruitful partnerships. "

Director - Strategic Marketing, Cell & Gene Therapy, FUJIFILM Irvine Scientific

# WHY PARTNER?

Whilst the cell therapy industry continues to grow at an exponential rate, there are still major challenges faced across all cell types, particularly when looking to keep manufacturing costs down and target the next generations of cellular immunotherapies. Our community of drug developers are urgently seeking expertise and capabilities from external organizations who can help advance their pipelines, including:

**Drug Discovery Platforms**

**Flow Cytometry/Cell Analysis**

**Pre-Clinical Model Providers**

**CROs & Patient Recruitment Support**

**Cell Culture Media & Growth Factors**

**CDMOs for Scale Up & Manufacturing**

**Logistics/Supply Chain Solutions**

We offer bespoke partnerships to support your commercial objectives, providing benefits such as:

### **Elevated Brand Visibility**

Increase market share through pre-conference and at-event advertising

### **Thought Leadership**

Speak on the main agenda to showcase your expertise and position yourself as an essential partner for success

### **Showcase Your Product**

In the exhibition room and give potential customers a hands on insight into your capabilities

### **Access to Hard-to-Reach Decision Makers**

Organize a private lunch or dinner alongside an event to gain exclusive access to your top prospects in a ring-fenced environment

### **Lead Generation**

Secure valuable face time with key decision-makers during speed networking and pre-organized 1-2-1 meetings
